VOLUME III REPORT NO. 35

S.G.O. 704.1-1

WEEKLY HEALTH REPORT

CURRENT MORBIDITY IN THE CONTINENTAL UNITED STATES

The purpose of this report is to call attention to the most recent data of current significance in regard to health conditions and hospital facilities in Army units in the Continental United States.

MORBIDITY DATA

In this report admission rates are shown for all causes (disease, injury and battle casualty) combined, for all diseases combined and for a few specific diseases. These rates are presented on an annual basis to facilitate comparison with corresponding rates in annual and monthly reports. Such annual rates of admission indicate the number of admissions per 1000 men exposed each week to the risk of a year's time in the current week's experience continued through the year.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U.S.C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

As indicated in the chart on page 3 the admission rates from all causes combined and from all diseases combined were practically identical with those for the preceding week. During August 1943 the admission rates from all causes combined and from all diseases combined were about 20% higher than in August 1942. The admission rate from diphtheria, erysipelas, etc. has in recent months followed closely the admission rate in the corresponding period of 1942.

EXPLANATORY MATTER

In reading the detail tables, it should be noted that any admission rate followed by a question mark (?) denotes a rate which has been computed on the basis of 5 or fewer cases. Such rates are unreliable as indications of trend. The symbol † has been placed after the name of stations (or groups of stations) where part or all of the data for the current week have not been received and the latest available figures have been substituted therefore.

WEEKLY HEALTH REPORT

CURRENT MORBIDITY IN THE CONTINENTAL UNITED STATES

The purpose of this report is to call attention to the most recent data of current significance in regard to health conditions and hospital facilities in Army posts in the continental United States.

MORBIDITY DATA

In this report admission rates are shown for all causes (disease, injury and battle casualty) combined, for all diseases combined and for a few specific diseases. These rates are presented on an annual basis to facilitate comparison with corresponding rates in annual and monthly reports. Such annual rates of admission indicate the number of admissions per 1000 mean strength which would occur over a year's time if the current week's experience continued through the year.

The report also shows the number of cases of the more communicable and certain other diseases of special interest. Appended to the report is a list of cases of the rarer communicable and certain other diseases.

HOSPITALIZATION DATA

The number of patients remaining in hospital at the end of the week per 1000 strength, as given in this report, furnishes an approximation of the current non-effective rate. Current hospitalization conditions are presented in terms of the normal beds available and vacant and the total (normal and other) beds occupied.

CURRENT TRENDS

AS INDICATED IN THE CHART ON PAGE 3 THE ADMISSION RATES FROM ALL CAUSES COMBINED AND FROM ALL DISEASES COMBINED WERE PRACTICALLY IDENTICAL WITH THOSE FOR THE PRECEDING WEEK. DURING AUGUST 1943 THE ADMISSION RATES FROM ALL CAUSES COMBINED AND FROM ALL DISEASES COMBINED WERE ABOUT 20% HIGHER THAN IN AUGUST 1942. THE ADMISSION RATE FROM COLDS, INFLUENZA, ETC. HAS IN RECENT MONTHS FOLLOWED CLOSELY ON THE ADMISSION RATE IN THE CORRESPONDING PERIOD OF 1942.

EXPLANATORY MATTER

In reading the detail tables, it should be noted that any admission rate followed by a question mark (?) denotes a rate which has been computed on the basis of 5 or fewer cases. Such rates are unreliable as indications of trend. The symbol # has been placed after the name of stations (or groups of stations) where part or all of the data for the current week have not been received and the latest available figures have been substituted therefor.
